

The Shadowserver Alliance

The Internet is a wonder of modern human achievement - a place where the world comes together for global business, science, education and leisure. However, such unprecedented inter-connectivity also exposes every organization and individual to new threats and borderless risks. This requires IT staff, CISOs, policy makers and system defenders to continuously strive to keep on top of the latest threats in order to protect themselves and their customers, users or constituents. Even the best defended networks do not exist in a vacuum and are impacted by the security of other networks globally.

The non-profit Shadowserver Foundation strongly believes that a free baseline of cyber security is essential and benefits everybody. We have worked tirelessly towards this goal for 18 years and are recognized as the world’s leading provider of proven public benefit, operational cyber security services. Shadowserver fulfils a unique role in the cyber security ecosystem as an internationally trusted, neutral third party. We have a proven track record for helping to successfully remediate many of the most serious threats on the Internet.

The Shadowserver Alliance is a group of like-minded organizations that share a vision of what is needed to make the Internet more secure.

Shadowserver Alliance Partners provide long-term sustainability for The Shadowserver Foundation’s essential mission. By joining The Shadowserver Alliance, Partners ensure the continued delivery of mutually beneficial, high quality, timely, actionable cyber threat intelligence and supporting services. Alliance sponsorship helps thousands of organizations and millions of Internet users globally every day - including each Partner’s own organizations and countries. Alliance Partners also gain access to a range of benefits and the ability to help prioritize which threats Shadowserver tackles next.

The Shadowserver Alliance is formally enshrined in Shadowserver’s legal governance documents, including multiple classes of dedicated seats for National CSIRTs (Class B) and corporate sponsors (Class C) on the governance Board of Trustees, as well as participation in a wider Advisory Board. Partner eligibility is reviewed by the Shadowserver Class A Trustees. Alliance Partners gain the rights to participate in the governance of The Shadowserver Foundation and influence operational activities, with the highest tiers of Alliance sponsorship providing Partners with opportunities for leadership, influencing strategic direction and financial oversight.

Together, Shadowserver Alliance Partners jointly improve global cyber security and contribute to achieving a more stable, resilient and secure Internet for all.

How To Join The Shadowserver Alliance

If your organization would like to join The Shadowserver Alliance and help support Shadowserver's essential public benefit services, please contact us via our website:

<https://www.shadowserver.org/contact/>

Or by email at contact@shadowserver.org.

We look forward to partnering with you and helping to make the Internet safer for everyone.

Receiving Free Data From Shadowserver
